

Using a number line to -

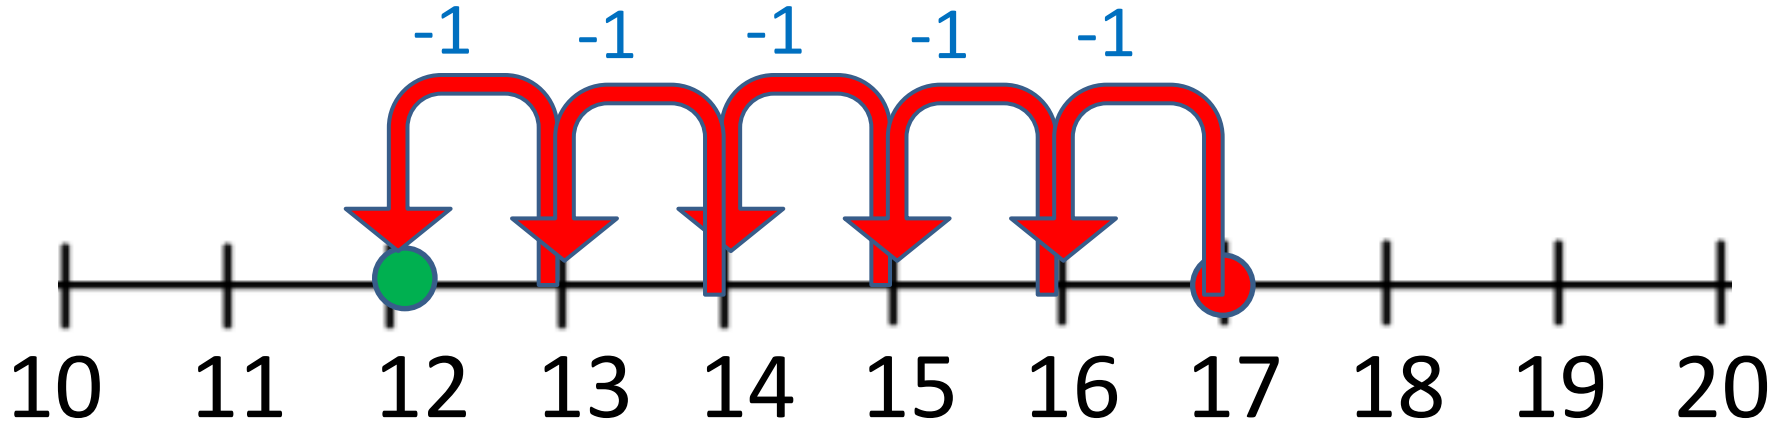

$$9 - 3 = 6$$

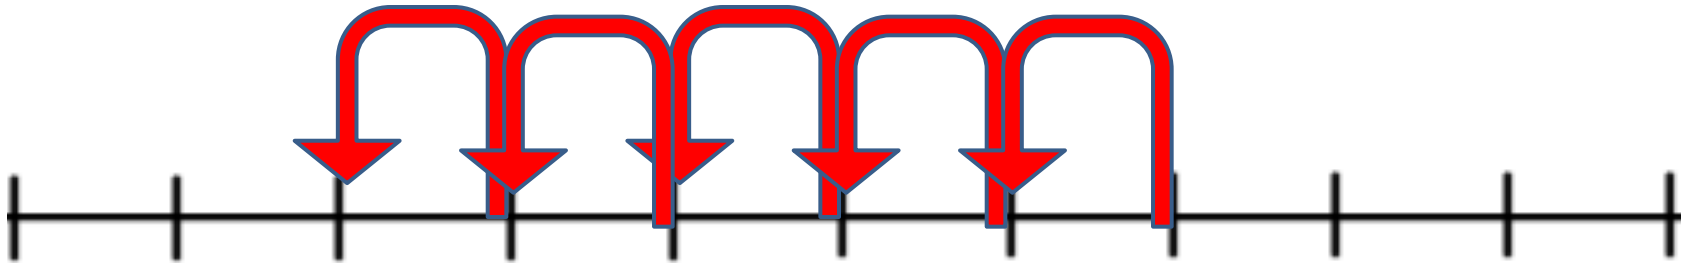

$$10 - 7 = 3$$

$$17 - 5 = 12$$

So when you take away you move
down the number line

Subtract by counting back:

- $18 - 9 =$
- $16 - 11 =$
- $14 - 9 =$
- $20 - 16 =$
- $26 - 21 =$
- $29 - 19 =$
- Draw a number line and show you jumps!
