

These tasks are intended to be done one a day however we understand that a different system might suit your home learning style better.

Task 1

I can know what **area** means.

<https://classroom.thenational.academy/lessons/area-part-1-estimating>

Task 2

I can calculate area.

<https://classroom.thenational.academy/lessons/area-part-2-calculating>

Task 3

I can calculate the area of rectangles.

<https://classroom.thenational.academy/lessons/area-part-3-cm2>

Task 4

I can calculate area in meters squared.

<https://classroom.thenational.academy/lessons/area-part-4-m2>

Task 5

I can explore mass and capacity.

Our next topic is going to be about mass (how much something weighs) and capacity (how much something can hold). Have a go at weighing some things around your house using weighing scales. You could also find a measuring jug and try and fill it with 100ml of water, then 200ml of water and so on. Have a look in your recycling for bottles and tins, find out how much liquid these containers could hold by reading the labels.
