

# REDWOOD NATIONAL and STATE PARKS California

# Redwood Trees

- Redwood trees are the tallest trees in the world.
- They grow in northern California.
- The barks of redwoods trees are reddish-brown.

# Crescent City

- This road is in Crescent City.
- Crescent City is located along the coast of northern California.

# Moro Rock

- Moro Rock is in the middle of Sequoia National Park.
- Hikers can climb to the top of the rock.

# Trails

- Visitors can walk along the trails in John Muir Woods.
- There are fences along the sides of the hiking trails.

# Hiker on Fence

- Hikers spend a lot of time looking up at the tops of the redwood trees.
- This hiker is sitting on a split rail fence and looking at the trees.

# Sentinel

- Some redwood trees have names.
- The name of this tree is Sentinel.
- The word '*sentinel*' means guard.

# Damaged Trunk

- The tree on the left was damaged by fire.
- Part of its trunk is missing.

# Cabin in the Woods

- This small cabin is surrounded by beautiful redwood trees.

# Log and Ferns

- A *log* is a section of a tree trunk or a thick branch.
- Bugs and insects are living on this log.
- Green ferns are growing on the ground.

# Moss

- Moss is growing on the bark of this tree.
- *Moss* is a small green plant with short stems.
- It grows in damp shady places.

# Snow in Winter

- The leaves of redwood trees remain green during the winter, too.

# **THE END**
